-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1742

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8, 10, 11, 14 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Wentorf, Jr. et al.

Wentorf, Jr. et al. discloses a method of making a composite body comprising:

providing an enclosure comprising a refractory material ((31);  
disposing a metallic liner (13) within said enclosure;  
placing a hard material comprising a hard material selected from cubic boron nitride and a PCD material within said metallic liner; and  
sintering the hard material fusing the metallic liner to the PCD material.

Wentorf, Jr. et al. further discloses wherein the metallic liner is selected from a group comprising Co.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1742

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 9, 12, 13, 15-19 and 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wentorf, Jr. et al.

Wentorf, Jr. et al. discloses the invention substantially as claimed (see paragraph 2 above). Wentorf, Jr. et al. further discloses temperature ranges that overlap the claimed range establishing a prima facie case of obviousness.

Wentorf, Jr. et al. is silent as to mounting the composite body on a support, but it would have been obvious to one of ordinary skill to mount the formed composite body in order to provide stability to the cutter.
